Vocalizer Text-To-Speech.

Nuance’s Vocalizer transforms the speech dialog experience by offering highly natural text-to-speech for every cloud and embedded use case. Vocalizer Cloud is offered through Nuance Cloud Services (NCS). Vocalizer Embedded is available as SDK for Windows, Linux, Android, and iOS-OSX platforms. Additional platforms are supported through professional services.

<table>
<thead>
<tr>
<th>Feature</th>
<th>Benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expressivity and naturalness</td>
<td>Improved expressive speech gives voices personality for the most natural and engaging experience possible</td>
</tr>
<tr>
<td>Multi-lingual support</td>
<td>Automatic language identification, foreign language dictionaries, and high-quality acoustic extensions provide unparalleled multi-lingual readout</td>
</tr>
<tr>
<td>Built-in domain intelligence</td>
<td>Optimization settings provide extra control options for special use cases such as SMS reading</td>
</tr>
<tr>
<td>Flexible speech generation</td>
<td>Volume, pitch, and speaking rate can be changed at run time for more dynamic and lively effects</td>
</tr>
<tr>
<td>Direct phonetic input</td>
<td>Optimal read-out of off-line phonetic databases such as navigation map data or music titles</td>
</tr>
<tr>
<td>User text rules</td>
<td>Customized read-out of application-specific abbreviations and text pattern using a user text processing rule set</td>
</tr>
<tr>
<td>User dictionaries</td>
<td>Application specific lexica can be phonetically optimized for accurate readout of exceptional pronunciation</td>
</tr>
<tr>
<td>Improved prompt tuning</td>
<td>With off-line tuning options any prompt set can be further optimized and customized for maximum quality</td>
</tr>
<tr>
<td>Seamless prompt insertion</td>
<td>Recorded audio prompts or tuned prompts are seamlessly blended with dynamic text-to-speech using automatic text matching (active prompt mechanism)</td>
</tr>
<tr>
<td>Vocalizer Studio</td>
<td>A comprehensive user-friendly suite of tools to prototype and optimize speech output applications. Easily create optimization data such as user text rules, user dictionaries and prompt databases</td>
</tr>
<tr>
<td>Languages and Voices</td>
<td>A truly universal voice portfolio offers 58 languages and 116 voices to facilitate the creation of global solutions using a single engine. The portfolio is continually expanding</td>
</tr>
<tr>
<td>Accuracy</td>
<td>High linguistic accuracy offers correct readout for all types of text including a large set of personal names</td>
</tr>
<tr>
<td>Scalability</td>
<td>A wide range of footprints scaling from 8 to over 900 MB ensures optimal performance from small mobile devices to powerful multi-media systems</td>
</tr>
<tr>
<td>Speech Synthesis Markup</td>
<td>Support of SSML allows for TTS vendor-independent markup which is correctly interpreted by Vocalizer</td>
</tr>
<tr>
<td>Language (SSML)</td>
<td></td>
</tr>
<tr>
<td>Daily dictionary updates</td>
<td>NEW Daily dictionary updates are offered through Vocalizer Cloud, guaranteeing accurate pronunciation of trending words and names in the news domain. Currently 6 languages (EEFGS) are supported, with more to be added in 2017</td>
</tr>
<tr>
<td>Morphed and multi-style voices</td>
<td>NEW Offline voice modifications are offered through professional services to change the perceived age and speaking style of a portfolio voice</td>
</tr>
</tbody>
</table>

Nuance’s Vocalizer complete speech output solution generates high quality speech through a seamless blending of dynamic text-to-speech, pre-recorded audio and optimized tuned text-to-speech. The new Vocalizer engine is optimized for reading long text in a much more natural sounding way. New signal processing algorithms improve overall smoothness of the voice output and advanced syntactical analysis gives the spoken text a natural prosody, resulting in a unique experience.

Applications
Nuance TTS technology has been deployed successfully in numerous demanding applications ranging from navigation and automotive UI systems and consumer electronics to assistive technologies and industrial applications.

Automotive
- route guidance
- turn-by-turn directions
- infotainment

Consumer electronics
- smartphones
- e-book readers
- toys and game characters
- electronic dictionaries

Accessibility products for blind and disabled
- screen readers for PCs and mobile phones
- daisy book readers
- talking kiosks and ATMs

Industrial
- warehousing stock picking
- transportation
Vocalizer Embedded 3.0

With a broad range of options, Vocalizer Embedded offers an excellent quality trade-off for a variety of platforms and applications.

**Code**

The code size for a fully featured Vocalizer Embedded engine is 3 to 5 MB depending on the platform. This can be optimized based on the required language set, features and compiler choices.

**Voice and Language Data**

<table>
<thead>
<tr>
<th>Voice Operating Point (VOP)</th>
<th>Flash size (excl. Code)</th>
<th>RAM usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Embedded Compact – small versatile TTS suited for constrained platforms</td>
<td>average: 8 MB max: 22 MB</td>
<td>average: 5 MB max: 18 MB</td>
</tr>
<tr>
<td>Embedded Pro – high quality TTS optimized for navigation, in-car infotainment readout; basic SMS reading capabilities</td>
<td>average: 45 MB max: 71 MB</td>
<td>average: 11 MB max: 23 MB</td>
</tr>
<tr>
<td>Embedded High – high quality TTS read-out for SMS, news, and e-mail reading on embedded targets, suitable for all types of applications and use cases</td>
<td>average: 90 MB max: 283 MB</td>
<td>average: 17 MB max: 45 MB</td>
</tr>
<tr>
<td>Embedded Premium – highest quality concatenative synthesis, only available for selected voices</td>
<td>average: 300 MB max: 550 MB</td>
<td>average: 120 MB* max: 250 MB</td>
</tr>
</tbody>
</table>

(*) RAM usage for Embedded Premium assumes platform supports memory mapping

**Multi-lingual voices** include recorded material for one or more foreign languages. They are released for Embedded Pro and Embedded High and require 50% more memory (flash and RAM) for Embedded Pro and 100% more memory for Embedded High.

**RAM usage** includes code, language data, selected voice data and dynamic RAM. RAM requirement for Embedded Premium is 120 MB if platform supports memory mapping, otherwise this increases to 180 MB.

**SDK Platforms**

<table>
<thead>
<tr>
<th>Platform</th>
<th>PC</th>
<th>Devices</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Windows: 32 and 64 bit Linux x64: 32 and 64 bit OS X: 32 and 64 bit, Intel only, OSX 10.9+, Xcode 6.0+</td>
<td>Linux ARM: ARM32 Hardfp, ARM32 Softfp, ARM64 Android v4.0 (Ice Cream Sandwich), API level 14+, ARM32-v7a Android v7.0 (Nougat), API level 24+, ARM64-v8a iOS: arm64, armv6, armv7, armv7s, i386 and x86_64 simulator</td>
</tr>
</tbody>
</table>

**Languages**

Vocalizer offers the world’s largest language and voice portfolio with 58 languages and 116 voices. This universal coverage facilitates the creation of global solutions using a single engine.
